Office Action Summary

Application No.

09/837,387

Applicant(s)

GONZALEZ ET AL.

Examiner

Kevin Y Kim

Art Unit

2634

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 April 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3,5 and 9-12 is/are rejected.
- 7) ☒ Claim(s) 4,6-8 and 13 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 25 June 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 4/19/01.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3,5,9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Piirainen (US 6,748,031).

Consider claims 1 and 2. Referring to Fig.2, Piirainen discloses a method of estimating a communication channel, comprising;

“determining at least first and second confidence levels that a transmitted data symbol has respective first and second values based on a received data symbol corresponding to the transmitted data symbol,” see col. 3, line 66 ~ col.4, line4 describing the confidence levels or probabilities of a received symbol y having one of a plurality of values x, and

“generating a channel estimate based on the first and second confidence levels.” See col.4, lines 32-49 describing the calculation of a channel estimate using the probabilities of a received symbol y having one of a plurality of values x.

Regarding claim 3, the calculation of a channel estimate is based on the confidence levels of the received symbols since it used the mean of the probabilities/confidence levels as well as the received data symbol y_k . See the equation at col.4, lines 35-40.

Next, claim 5 is considered. Referring to Fig.2, Piirainen discloses a method of making a channel estimate, comprising:

“generating a confidence factor according to a confidence function and a received data symbol, the confidence factor representing a confidence level that a transmitted data symbol corresponding to the received data symbol has a particular symbol value,” see col. 3, line 66 ~ col.4, line 4 describing probabilities of a received symbol y having one of a plurality of values x , i.e., the confidence factor according to “a confidence function,” i.e., a Viterbi detecting function, see col.3, line 66 ~ col.4, line 4 and

“generating a channel estimate based on the confidence factor and the received data symbol.” See col.4, lines 32-49 describing the calculation of a channel estimate using the probabilities of a received symbol y having one of a plurality of values x .

Next, claim 9 is considered. Referring to Fig.2, Piirainen discloses a method of making a channel estimate, comprising:

“determining a strength indicator based on a received data symbol corresponding to a transmitted data symbol, a value of the strength indicator

Art Unit: 2634

indicating a likelihood that the transmitted data symbol is a particular value,” see col. 3, line 66 ~ col.4, line 4 describing probabilities of a received symbol y having one of a plurality of values x , i.e., “a strength indicator” of the received symbol, and

“generating a channel estimate based on the confidence factor and the received data symbol.” See col.4, lines 32-49 describing the calculation of a channel estimate using the probabilities of a received symbol y having one of a plurality of values x .

Regarding claims 10 and 11, Piirainen teaches a binary modulation, one of which is the bi-phase shift keying, where a transmitted symbol obtains the values of 1 or -1. See col. 4, lines 22-24. Thus, the strength indicator, i.e., a numeral representation of probability, approaches a value of 1 the greater the likelihood that the transmitted data symbol was 1 and approaches a value of -1 the greater the likelihood that the transmitted data symbol was -1.

Regarding claim 12 calling for performing the probability determinations and the strength indicator determination according to a predetermined function, see col.3, line 66 ~ col.4, line 4 describing computing the probabilities according to a Viterbi detecting function.

Allowable Subject Matter

3. Claims 4,6-8 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2634

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Y Kim whose telephone number is 571-272-3039. The examiner can normally be reached on 8AM --5PM M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 571-272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
